VOSS AUDIO IP NETWORK AUDIO ENCODER & DECODER DI-9700NA

Product Features

- 19" rack mount IP network audio encoder & decoder (one function at a time)
- Encodes analog audio (media player & mic) into IP audio streaming
- Upgrades analog PA to IP system without replacing existing amps or speakers
- Supports up to 6,000 encoder units in one system
- Software-programmable output to single, multiple, or all zones
- Compatible with DI-9700 series IP decoders, amplifiers & speakers
- Uses existing network — minimum cabling, non-dedicated LAN/WAN/Internet
- Ideal for schools, offices, restaurants & fitness centers
- Remote volume control & programming via server software
- 1× aux in, 1× mic in, 1× aux out, USB (reserved), RJ45 for network
- Separate attenuators for aux, mic & aux output
- Status indicator for encoder/decoder task activation
- Protocols: TCP, UDP, ARP, ICMP, IGMP | Speed: 10/100Mbps
- Audio: MP3, MP2, 16-bit stereo | Sampling: 16K–48KHz
- S/N ≥90dB, Freq response 20Hz–20KHz, Delay ≤40ms
- Power: 220V AC, ≤35W | Temp: -20°C~+60°C | 482×44×226mm, 1.3kg
