

Subwoofer

LS-15B

LS-15B subwoofer has been designed for situations where high-quality bass is required. The small size can save more space for users and it has been designed to be used with MA-10 and MA-12 systems to extend total low frequency output power. No matter how long you hear the bass. You will never feel irritable and tired because the bass is very soft and comfortable. The fierce LF driver attribute to the energy launch of low frequency more centrally. It is suitable for indoor KTV reinforcement system.
